Supreva Connect

IT and internet, sorted fast.

Fibre, 5G and LTE internet, Wi-Fi, email, websites and hardware for homes and businesses. Simple month-to-month plans, local support, no hassle.

Price list

Month-to-month | Homes and businesses | Fibre, 5G and LTE | Setup and support available

Why our prices are a little higher than some other providers: we come out to you personally. If your line breaks, we do the on-site fault finding ourselves, and we handle fibre splicing, repairs and line maintenance when needed. You get real, personal attention instead of a call centre queue, and that is what the small extra on the line pays for.

Fibre internet

Uncapped fibre, with the speed shown as download/upload in Mbps. Prices are per month. Which networks are available depends on your address. Send us your address on WhatsApp and we will check what is available and recommend the best speed for you.

A free-to-use Wi-Fi router comes with your fibre connection. Many fibre networks also offer free installation on new connections (selected networks, terms apply). We will confirm for your address.

5G and LTE home internet

No fibre at your address, or need internet today? Plug-in 5G/LTE home internet works almost anywhere there is coverage. A compatible router is required (see hardware).

> **Best effort:** all 5G and LTE services are best effort. Speeds and coverage depend on the mobile network signal at your address and are not guaranteed.

- All prices are in South African Rand. Prices can change without notice and are confirmed when you order. Hardware is once-off and subject to stock.
- Fibre, 5G and LTE services are month-to-month. The first month is charged pro rata from the day your service starts.
- Uncapped plans are subject to a fair-use policy. Speeds on wireless plans depend on signal and network capacity.
- Fibre availability and the networks offered depend on your address. Some speeds are only available in selected areas.
